In this Delphi Programming video we write a tiny Quote of the Day application using the Quote of the Day service. This video is three and a half minutes long and was recorded at 1024x768 (normally I do 800x600 so they work on YouTube, oops - I can't be bothered doing it again). I was originally going to popup the quote in a balloon hint, however Camtasia 3 did not record the balloon for some reason - I guess I'll leave that as an excersie for the interested. You can watch the video [here](#).
